Summary

Full-Stack Developer with 2+ years of experience specializing in **Angular** and **.NET Core Web API**. Proven expertise across the full **SDLC**, from leading **R&D** projects to deploying scalable enterprise solutions using **SQL Server**, **PostgreSQL**, **Docker**, and **Azure DevOps**. Adept in **Agile** environments, focusing on responsive UI design, clean **OOP** principles, and high-performance, modular code.

Experience

Software Engineering

Jan 2024 – Present

RBIS Technology Pvt. Ltd.

Pune

- **Full-Stack & Database Engineering:** Engineered scalable applications using **Angular 16**, **.NET Core Web API**, and **EF Core**; designed and optimized complex relational schemas in **SQL Server** and **PostgreSQL**.
- **Azure DevOps:** Managed the application lifecycle by configuring automated **CI/CD pipelines** to streamline enterprise-level deployments.
- **R&D & Quality Leadership:** Spearheaded R&D initiatives to evaluate emerging technologies and maintain high code quality through rigorous peer reviews and **OOP** principles.
- **Technical Delivery:** Translated complex business requirements into maintainable, high-performance software solutions within fast-paced environments.

Projects

Catalyst CMS

Developed an advanced content management system designed to streamline content distribution across web and mobile via a dynamic component architecture. I architected core services using **Angular 16** and **.NET Core Web API**, implementing multi-threading to optimize high-volume content processing. I automated the deployment lifecycle through **Azure DevOps** and enhanced user engagement by integrating **Twilio (SMS)** and **SendGrid (Email)**, while syncing data with **Salesforce** for advanced business reporting. Using **Sentry** for monitoring, I ensured 24/7 stability and achieved a **30% improvement** in delivery timelines through Agile iterative development.

GoodWill Website (Company Brand Website)

Designed and developed a responsive brand platform using **Angular 16** and **TypeScript** to modernize the company's digital identity. I architected a modular frontend using **Bootstrap** to ensure a seamless, mobile-first experience and optimized the application for high performance and fast load times. By resolving critical UI/UX bottlenecks and ensuring consistent cross-browser compatibility, I delivered a high-fidelity production environment that strictly adhered to modern web standards and enhanced overall brand alignment.

· **Rbis Talk (Internal Product) | Project Lead**

Led the development of **Rbis Talk**, a high-volume customer onboarding and bulk messaging platform. I engineered the full-stack architecture using **Angular** and **.NET Core**, integrating **Facebook Embedded Signup** and the **WhatsApp Cloud API** to automate large-scale messaging workflows. I designed a robust backend using **EF Core** and **PostgreSQL** to manage complex messaging queues and implemented **Sentry** for real-time API monitoring. By leveraging **Azure DevOps** for automated deployment, I delivered a scalable internal tool that transitioned manual marketing tasks into a fully automated, data-driven system.

Education

- **MCA** 2022-2024
North Maharashtra University, Jalgaon
- **B.Sc in Computer Science** 2019-2022
North Maharashtra University, Jalgaon

Technical Skills

Languages & Frameworks: Angular 16+, TypeScript, .NET Core Web API, C#, Entity Framework (EF) Core
Web Technologies: HTML5, CSS3, JavaScript, Bootstrap, RxJS, RESTful APIs
Databases: MS SQL Server, PostgreSQL
DevOps & Tools: Azure DevOps (CI/CD Pipelines), Git, GitHub
Third-Party Integrations: WhatsApp Cloud API, Facebook Embedded Signup, Twilio (SMS), SendGrid (Email), Salesforce, Sentry (Monitoring)
Concepts: Object-Oriented Programming (OOP), Software Development Life Cycle (SDLC), Agile/Scrum, R&D, Responsive UI Design, Microservices Architecture
